

GINO BRONSTEIN

Software developer and systems specialist moving into AI engineering

Amsterdam, NL

+31 6 3427 7734

gino.bronstein@gmail.com

PROFILE

I learn by building. Years in systems support taught me where work actually breaks. I now turn that experience into practical AI products with human approval, verification, and clear failure handling.

CONTACT

career.autoclouds.dev

FOCUS

AI agent orchestration and tool use

Human approval and planning

Evaluations and hallucination control

Verification and failure handling

Systems support and documentation

EDUCATION

NATIN

MBO level 4, ICT Application Development. Completed 2018; diploma issued Feb 2019.

Inholland University of Applied Sciences

Business IT & Management coursework, 2022 to 2024. No degree claimed.

LANGUAGES

Dutch and English: native proficiency

Italian: currently learning

PROJECT ARES

Native macOS workspace for reliable software delivery with AI

Active pre-release. Ares coordinates models and tools while keeping intent, risk, approval, verification, and recovery visible to the human in the loop.

- Freezes a reviewable plan before execution and fails closed when proof is missing.
- Runs mutation work in isolated Git worktrees and records commands, diffs, checks, and receipts.
- Routes Claude, Codex, Gemini, GitHub, and local Ollama adapters without making one model central to the product.
- Supports independent review, revision, interruption recovery, and execution lanes with privacy controls.

Latest local evidence: 12 harness gates passing / 424 test methods / 33 test files

EXPERIENCE

System Support Engineer - Travix

Mar 2025 to present

- Identified blockers in process flows, proposed and implemented improvements, and kept documentation current.
- Led the migration upgrade from a discontinued Excel version to Microsoft 365.
- Contributed to the innovation team and led the creation of the game room.
- Acted as first point of contact between business partner Trip.com and internal employees.

Support and infrastructure foundation

2019 to 2024

System administration and technical support across the Ministry of Finance in Suriname, SoftTech, freelance work, Change=, and igen placements at Sanquin and Rijkswaterstaat. I learned to diagnose clearly, communicate calmly, document the fix, and improve the system around each incident.

ADDITIONAL

Cisco CCNA Routing and Switching certification. Comfortable with Google Cloud, Jamf, SCCM, SSO, Jira Service Management, onboarding, internal workflows, and technical documentation.
